

Biology: Required Practical 7

- What is this required practical about?

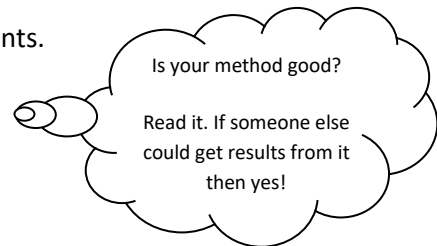

.....

- Why is it important to count the rosettes, not the flowers?

.....

.....

- Think about how you carried out this practical.
Write a logical and comprehensive method, using numbered bullet points.

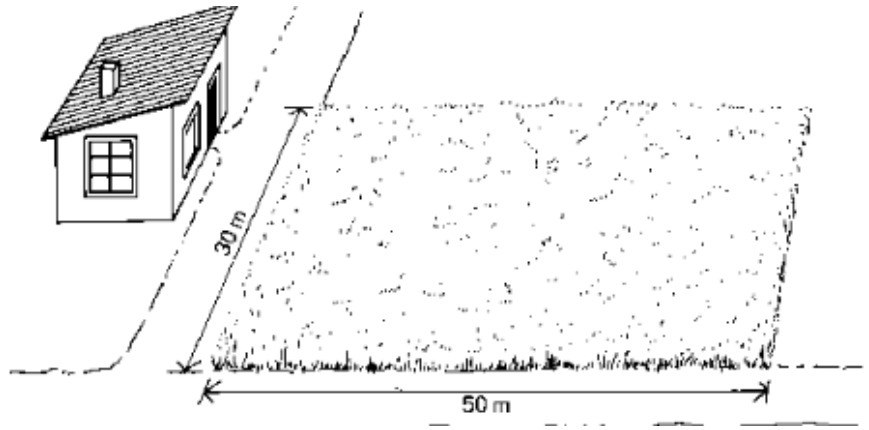

- A student decides to make a daisy chain. Why should the student **not** do this?

.....

.....

- This is a field. How would a student calculate the area of the field?

.....

.....

- An alternative way to measure the distribution of organisms is by using a transect. Outline the method you would use to take a transect of the field below.

.....

.....

.....

.....

.....

- How can you use the data collected, either with a transect or a quadrat, to estimate the size of the overall population?

.....

.....
